ADVANCED SPADE COMPANY

PROVEN UNDERGROUND.

We design the sensors, write the software, and run the crews that make the underground knowable. We're hiring engineers and operators who want a real, physical problem to work on.

The last unmapped place in America is under your feet.

Underground infrastructure is multiplying. No one can see what lies ahead.

We can.

OUR MISSION: MOVING AMERICA UNDERGROUND.

HOW IT'S DONE TODAY

Guess. Guess Again. Strike. Repeat.

01

DESIGN FROM OLD RECORDS

EVERY UTILITY, ITS OWN RECORD.
DIFFERENT ERA, FORMAT, ACCURACY.

02

811 CALLED, MARKINGS GUESSED

PAINT TRACES THE OLD MAPS.
±2 FT AT BEST.

03

IMPERMANENT RECORD, MAPPED POORLY

NO RECORD, NO REFERENCE.
WASHES AWAY.

04

LINE STRIKE

AN UNMARKED LINE MEETS EXCAVATION EQUIPMENT.
OUTAGE. CLAIM.

>> RETURN TO STEP 01. REPEAT.

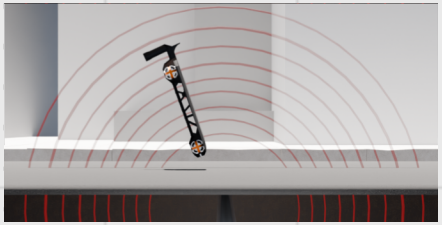

Nothing is measured.

The guesses become the records.

ONE STRIKE EVERY 3 MINUTES. $30B A YEAR IN SOCIETAL COSTS. [CGA DIRT, JULY 2026]

HOW WE DO IT

Map. Design. Drill. Record.

01

MAP EVERYTHING FIRST

POSITION + DEPTH PERMANENTLY RECORDED.
BASEMAP CREATED BEFORE DESIGN.

02

DESIGN ON THE BASEMAP

CROSSINGS KNOWN, RISK MITIGATED.

03

HDD: NAVIGATE THE KNOWN

NO TRENCH. NO SURPRISES.

04

A PERFECT AS-BUILT

DATABASE GRADE. SHIPS WITH THE JOB.

Every step is measured.
The proof is permanent.

>> REPRODUCIBLE RESULTS EVERY TIME.

ALL UTILITIES RECORDED. A MAP THAT YOU CAN RELY ON.

ADVANCED SPADE COMPANY

A memo for candidates.

Eight sections. What we're building, why the company exists, the market, how we win, the arena we're in, the team, where we are today, and how this gets big.

EVERY NUMBER SOURCED. AUGUST 2026.

America's biggest digging decade. Dug blind.

62 SEC

BETWEEN UTILITY STRIKES IN THE US. [CGA 2025]

$83.2B

DAMAGE COST PER YEAR. NEARLY 3× THE OLD ESTIMATE.

PAPER

WHAT PASSES FOR RECORDS. INCOMPLETE, WRONG, OR MISSING.

Everyone digs. Nobody can see.

OUTAGES. FINES. INJURIES. STOPPED PROJECTS. EVERY 62 SECONDS.

EVERY NUMBER SOURCED. AUGUST 2026.

Why this company exists.

1. OVERHEAD UTILITIES ARE FAILING.
2. EVERYONE, FOR EVERY REASON, WANTS UNDERGROUND.
3. THE BARRIER HAS ALWAYS BEEN COST.
4. COST IS DOMINATED BY TRENCHING. SLOW, AND DISRUPTIVE.
5. TRENCHLESS TOOLS ARE PROVEN CHEAPER.
6. TRENCHLESS IS LIMITED, BY NAVIGATION, TO RURAL, LOW DENSITY GROUND.
7. TO DRILL WHERE IT MATTERS MOST, THE TECHNOLOGY HAS TO GET BETTER.

SAID DIRECTLY:

We need a better GNC system to drill in the most valuable areas.

THE DEMAND IS FUNDED AND NAMED: $73B PG&E GRID PLAN · $42.5B FEDERAL BROADBAND · AN $83.2B ANNUAL DAMAGE PROBLEM. [SOURCED]

Demand is not the constraint. Capability is.

$9B → $16B

HDD MARKET BY 2030. OUR CRAFT.

$73B

PG&E FIVE YEAR GRID PLAN.

10,000 MI

CALIFORNIA POWER LINES GOING UNDERGROUND.

$42.5B

FEDERAL BROADBAND BUILDOUT. [BEAD]

All of it is feet in the ground.

AND THERE AREN'T ENOUGH CREWS WHO CAN DIG IT SAFELY.

FUNDED BY LAW AND THE AI BUILDOUT. NAMED AND BUDGETED.

We drill.
The map compounds.

01

DRILL

REAL REVENUE, TODAY.

02

MAP

EVERY JOB FEEDS AYER.

03

FASTER + SAFER

THE MAP DE-RISKS THE NEXT BORE.

04

MORE WORK

BETTER MARGINS WIN BIDS.

>> MORE WORK MAKES MORE MAP. THE LOOP IS RUNNING TODAY.

THE STACK WE BUILT TO RUN IT:

CRKT SENSORS ON OUR RIGS **AYER** TURNS EVERY JOB INTO VERIFIED MAP **KODA** RUNS THE BUSINESS END TO END

CONTRACTORS BET THEIR LIVELIHOOD ON THEIR TOOLS. YOU CANNOT SELL GOLDEN SHOVELS.
SO WE PROVE EVERYTHING ON OUR OWN JOBS, AT OUR OWN RISK, FIRST.

NOT A PLAN. REVENUE IN, HARDWARE ON RIGS, MAP GROWING EVERY JOB.

Everyone has a piece. Nobody has all four.

EXODIGO	THE MAP ONLY. NO DRILL, NO REVENUE.	**$700M**
THE BORING CO	INTEGRATED TUNNELING. PROOF DIGGING PAYS.	**~$7B**
EQUIPMENTSHARE	MACHINES + A DATA LAYER. FILED TO IPO.	**$6B+**
QUANTA	CREWS AT NATIONAL SCALE. NO DATA EDGE.	**Tens of $B**
BASE POWER	OUR EXACT MODEL, IN HOME ENERGY. 3 YEARS OLD.	**~$13B**
ANDURIL	HARDWARE + SOFTWARE VS LEGACY PRIMES.	**~$61B**
ADVANCED SPADE	MAP + DRILL + HARDWARE + SOFTWARE. ONE COMPANY.	**Series A**

AN HONEST READ: EVERY COMPANY HERE IS YEARS AHEAD OF US. AT OUR STAGE, MOST LOOKED LIKE THIS.

44 people. Half hold drill steel. Half build the machines.

AND WE WORK THE SAME JOBS.

No mapping startup has our drillers.

No contractor has our engineers.

[XXX] combined years underground · [XXX,XXX] feet drilled · Licensed in CA + NV · Engineers from [_____], [_____], [_____]

Daniel Kimminau, CEO [one line] · Robert Boag, COO [one line] · Cam [_____], Chief Engineer [one line]

YOU CANNOT MAKE A GOOD TOOL UNLESS YOU USE IT EVERY DAY. THE COMPOSITION IS THE POINT.

What exists today.

CRKT

A SOFTWARE DEFINED SENSOR, NOT A NOISE METER. A LOCATE STOPS BEING A MARK ON PAVEMENT AND BECOMES A GEOREFERENCED DATASET WITH CENTIMETER COORDINATES.

AYER

THE MAP OPERATING SYSTEM. EVERY JOB, SENSOR, AND RECORD LANDS IN ONE SYSTEM OF RECORD. OWNERSHIP IS CLEAR AND AUDITABLE. THE DATA NEVER LEAVES AMERICA.

DRILLING

REAL HDD REVENUE, TODAY. EVERY JOB WE DRILL FEEDS THE MAP, AND THE MAP MAKES THE NEXT JOB FASTER AND SAFER. THE LOOP IS RUNNING. NOT A PLAN.

WHERE WE ARE:

44 people, half on drills, half on tools · $15M Series A from Sutter Hill Ventures · Licensed in CA and NV

BETTER DATA = BETTER PERFORMANCE. PROVEN, TIME AND TIME AGAIN, IN CONSTRUCTION.

Three prizes. Any one is a large company.

01 \\ CONTRACTING

Own the digging.

MARGINS NOBODY ELSE CAN TOUCH, IN A MARKET OF THOUSANDS OF SMALL CONTRACTORS. THE BEST OPERATOR DOES THE CONSOLIDATING. QUANTA DID IT WITH NO DATA EDGE.

02 \\ TOOLS

Sell the stack.

EVERY TOOL WE BUILD FOR OURSELVES IS A PRODUCT FOR AN INDUSTRY WITH AN $83B PROBLEM AND NOWHERE ELSE TO BUY. PROVEN ON OUR JOBS, SOLD WHEN EARNED.

03 \\ DATA

Own the map.

THE VERIFIED MAP OF THE UNDERGROUND, BUILT FOOT BY FOOT. NEEDED BY EVERYONE WHO EVER DIGS. THE ASSET THAT OUTLIVES EVERY JOB.

WE'RE AN UNDERSTATED COMPANY. BUT THE PLAN IS NOT TO PARTICIPATE IN THIS MARKET.

The plan is to run it.

PATHS OUT: IPO AS TECH-DRIVEN INFRASTRUCTURE, OR ACQUISITION. BOTH BUYERS EXIST TODAY. [EQUIPMENTSHARE FILED AT $6B+, 2026]
